Drug repurposing for Neuro-fibromatosis
Genomics
Multimodal data integration for Alzheimer disease classification
GraphPrint: Drug Protein affinity prediction
Pharmaco-Genomics
Phenotyping & Early detection
Early detection and screening of Lung cancer
Leveraging Inter-department data using Continual learning
Healthcare Systems
Health + AI
Patient assistance
Medical Image based question answering for patients
Surgical and Medical devices
Pet health analytics and tele monitoring
Efficient blood pumping in Bionic heart
Medical suturing automation
Active guidance of sleep using reinforcement learning
